Message from the CO - Rear Admiral JOHN YELVERTON

CAPTAIN'S FAREWELL ADDRESS

When I took over as captain of the USS Haise in 2014, it was a very daunting task. I had always been told that when you take charge of something, you must always leave it in the same or better condition than it was when you found it. The problem was, I was taking over for Lucy Ferron. She had won the Starfleet International CO of the year twice in 2005 and 2009. She had won Region 2 CO of the year three times in 2005, 2009 and 2012. Most of all, she led the Ship to winning Starfleet International Ship of the Year in 2006, and Region 2 Ship of the Year in 2006, 2007, 2008, and 2012. I honestly didn't know who you could possibly maintain that excellence, let alone attempt to improve on it.

My confidence was bolstered a little, when we won the Region 2 Ship of the Year Award in my first year of 2014, and I was doubly excited when we won it again in 2017. That being said, nothing compared to the joy of winning the Starfleet International Ship of the Year Award in 2017 as well. I found myself staring at that award with loving eyes which I normally only reserve for my family. I was pleased and honored and grateful to have won that award, but I, of course, didn't do it alone. Everything that you all have done for this Ship and the charities which we support is what has enabled us to win these awards. I was simply the leader, but the leader is nothing if no one follows.

Lucy Ferron served the USS Haise for nearly ten years, and we won Ship of the Year in four of those ten years. That's a Ted Williams batting average of .400. I have now served the USS Haise for nearly five years, and we have won Ship of the Year in two of those five years. We might win in 2018 too! The results won't be announced until May. Regardless, I can successfully say that with your help, I have maintained the standard of excellence which Lucy Ferron helped set for us. I may have even upped the bar, we won't know until May, so Ryan Case now has his own big shoes to fill, and possibly bigger.

CAPTAIN'S FAREWELL ADDRESS
- cont'd

03-975683

04-765466

05-224353

06-576565

That is why I am stepping down as your Captain. My personal and professional life have consumed my time and energy to the point that I am no longer serving in the capacity as your Captain to the level that I want to and at the level I expect of myself to perform. I refuse to leave the Ship in worse condition than I found it, and I can only guarantee that, if I step away at this time. That being said, I know that I am leaving the Ship in the best possible hands of Ryan Case.

Ryan has proven himself for years in his role as Region 2 Coordinator, and I am convinced that he will bring that same energy to the Ship, and that he will maintain the same level of excellence that we have all come to expect and appreciate. That being said, Ryan Case is not John Yelverton, any more than John Yelverton is Lucy Ferron. He will run the Ship his own way, and he will do it in the way which he sees fit, and you need to let him do it. We had an election, and you elected him. Unanimously, I might add. If you had wanted to be the Captain, you should have stepped forward. Since you did not, you need to let Ryan be the Captain, and let him do the job which you elected him to do. I say this as a warning, because every time we have had a change of command, someone in the Ship has attempted to cajole, coerce or even bully the Captain into letting them have their way and be, for all intents and purposes, either the pseudo-captain, or the power behind the throne. Those people are no longer here, but they left pain and misery in their wake as they sailed away. Don't do the same thing to Ryan. If for nothing else, but for my sake, don't do the same thing to Ryan. If you feel that he is doing a horrible job, you will be free to run against him in two years.

Until that time, follow the words of Romans 13:1-2, and submit yourselves to the authority, which again I will say, you elected unanimously, which you placed in the hands of Ryan. I know that he will do a good job. He has my full support, even though I know that he's going to show original series episodes with the new special effects. For my own part, I thank you for the honor and the privilege you have given me for these five years to be your Captain. To lead this Ship and maintain it in a way that honors both Fred Haise and the principles of *Star Trek* with Infinite Diversity in Infinite Combinations while eliminating greed and helping those who need a hand, and loving science and literature through this science fiction show which calls us to explore God's creation both outwardly and inwardly. It has been an honor and a privilege being your Captain, and I will treasure this time in my memories, always. In conclusion, I will simply say to you the words, which Leonard Nimoy lifted and paraphrased from the benediction in Deuteronomy 5:33.

Special "Thank You" to XO Ryan Case for his awesome help with the newsletter.

By the time this newsletter reaches you, we will be celebrating a new year 2019. Time is flying by. Blessings and good health to you and your family.

This last quarter of 2018 was very busy for our crew and their families.

Our family was saddened by the loss of our 11½ year old female green iguana, Zoe, on November 10th due to short illness which her vet and Michelle did everything they could for her. I loved her dearly and she & Khan (our male iguana) were in my home for nine years and Michelle had them for 2 ½ years. I last saw Zoe and held her in my arms last October while taking care of both iguanas while at Michelle's home. Here is a picture of a memorial that Michelle set up at her home at Thanksgiving. Zoe was cremated & is forever with us. Khan is doing great and is loved so much.

05-167524

We had so much fun at Michelle & James' home during the Christmas holidays. We spent over two weeks with them. The first week they were gone on a vacation cruise to the Western Caribbean and I enjoyed taking care of Khan. We picked them up at the airport on December 23rd. In fact, that day around noon, I looked out Michelle's big kitchen window and it was snowing – big giant flakes! Unfortunately, it did not stick! We spent Christmas day and lunch at James's parents house along with his brother's wife's family which we have gotten to know very well and consider them a part of our family too! So much fun, and I have never seen so many presents! Most were for James' 2 ½ year old nephew. I got the most interesting Star Trek gift from a family member that day. I am including a picture. I've never seen a Star Trek rolling pin before! Michelle got one with dinosaurs on it!

04-865214

We missed the Haise November & December meetings because we were at our daughter's home in Clarksville, Tennessee. We love to go their house so much!

Look for exciting things in 2019 and the future coming up for the USS Haise.

Congratulations to our 2019 newly elected CO – Commodore Ryan Case and our new XO Captain Joe Keenan. Best wishes to John Yelverton who is stepping down as our CO. He will serve as our new Chief of Security in 2019.

Saturday, October 20 - 6:30 pm - Monthly Meeting/Costume Party at Broadmeadow United Methodist Church, Fellowship Hall, 4419 Broadmeadow Drive, Jackson, Mississippi

A small group of crew members arrived in costume, Star Trek Uniforms, Star Trek T-Shirts, or not and enjoyed great food, games, and a movie. At our business meeting, John reminded the crew about the nominations for a new CO of the Haise to be held at the next meeting. He is not seeking re-election. He thanked everyone for the honor and privilege to serve as CO. Reminders: Toys for Tots donations need to be brought to our November meeting. Christmas party with Dirty Santa will be at Clay's home. Viewing of the new Aquaman movie will be in late December.

Best Costume winner was: Clark. 2nd Place Best Costume winner was Clay. With no other business, we started our games.

Star Trek trivia contest was won by:

1st round—Joe Keenan, 2nd round—Jason Young. Bingo was our next game and winners were Linda Nobles & Clay Bartunek. Some of us played more games. Then we watched the Hokie Horror Movie chosen for the night: Creature from the Black Lagoon.

We had an out of this world time!

12-357854

Saturday, December 15—6:30 PM Meeting/Christmas Party & Dirty Santa at Clay's home. Your editor is sorry she did not get to attend due to being out of town for the Christmas holidays with family. We had a great turnout with lots of wonderful food, and great fellowship. Dirty Santa was so much fun! There was a lot of stealing going on! Before all the fun started, supper and our business meeting came first.

Sunday, October 7 - Jackson, MS Diabetes Walk

Southern Farm Bureau, Jackson, Mississippi

Registration was at 1 pm - Walk began at 2 pm

We volunteered and/or donated to Bethany

Theilman's USS Haise Star Trek Fan Club Team

We've been supporting the Diabetes Foundation of Mississippi for a long time now. We even have a plaque. This is because DFM is a real bootstraps type of organization. A kid gets diagnosed, someone takes a backpack full of supplies and age-appropriate information for child and parents. Someone is out of work, and hasn't had time to get on Medicaid yet, they provide a month's worth of insulin. "We are Family" is the walk theme, and they really are, with former clients now working there as staff who really "get" it.

Two crew members, Bethany and Clay pictured in top right, attended.

Above: Bethany created this year's Diabetes Walk T-shirt - so cute!

Welcome Back,

USS Haise

**Celebrating 24 years
of walking with us!**

FRED HAISE ATTENDS A STAR TREK CONVENTION

Destination Star Trek Birmingham added Jonathan Frakes and real-life former NASA astronaut Fred Haise (who piloted Apollo 13 and served as Commander of the Enterprise) to the guest list for the event, which was held at the National Exhibition Centre (NEC) in Birmingham, England, from October 19-21, 2018.

15-211367

15-487102

15-551220

15-989651

At *Destination Star Trek* they were proud to present their Science and Education Zone! You could come see a real Apollo spacesuit, a life size Apollo Lunar Module landing leg, a real Space Shuttle tile and more. This was where you could find the fascinating scientists from the European Space Agency, astronomer Mat Irvine, and education specialists throughout the weekend. NASA astronaut, Lunar Module Pilot for Apollo 13 and the Commander of the Space Shuttle Enterprise Fred Haise also spent some time throughout the weekend in this Zone to chat with attendees.

15-102348

Over the weekend, Fred Haise, participated in some of the great panels available:

Fred Haise –
 "In Conversation with..." on
 Saturday and Sunday

15-211367

Fred gave a lecture where he talked about not only Apollo 13, but the work he did flying approach and landing tests of the prototype Space Shuttle Orbiter, which was (appropriately for the occasion) named *Enterprise*. He mentioned that he felt more pressure flying *Enterprise* than he had when working on Apollo; after all, if anything went wrong, there was no replacement Orbiter and only so much funding! Haise ultimately left NASA in 1979, before the Shuttle was ready for space; despite the disappointment of not getting to walk on the Moon, he said that today he looks back and feels happy with his career.

HAPPY BIRTHDAY
FRED HAISE
NOVEMBER 14TH

15-487102

15-551220

15-989651

15-102348

Fred Haise, along with his granddaughter Dakota, traveled to Switzerland & Germany recently. They visited Technik Museum in Germany which is south of Frankfort. It has the largest Apollo exhibit. Below is a press release from the museum.

Here are a few pictures he sent to me for our newsletter.

Space Consult & Technik Museum Speyer press release
10th anniversary of Europe's biggest exhibition for human space flight 'Apollo and Beyond'

We have the incredible honor to announce a public event with astronaut Fred Haise for the 10th anniversary of the exhibition "Apollo and Beyond."

Space Consult and Technik Museum Speyer will host a visit to Germany for Apollo 13 lunar module pilot Fred Haise!

15-211367

15-487102

15-551220

Fred Haise is one of the last living Apollo legends. It will be the highlight for the Technik Museum Speyer this year beside the STS-55/Spacelab D-2 anniversary and we feel privileged Haise has chosen us to spend some memorable days for our anniversary in Germany.

Official public event Sunday, Oct. 14, 2018, time to be announced, at the fantastic setting of Europe's biggest exhibition for human space flight "Apollo and Beyond" at Technik Museum Speyer in Germany with a lecture by Haise about his Apollo 13 mission as well as the flights of the space shuttle Enterprise in the Approach and Landing Test (ALT) program, followed by Q&A session.

15-989651

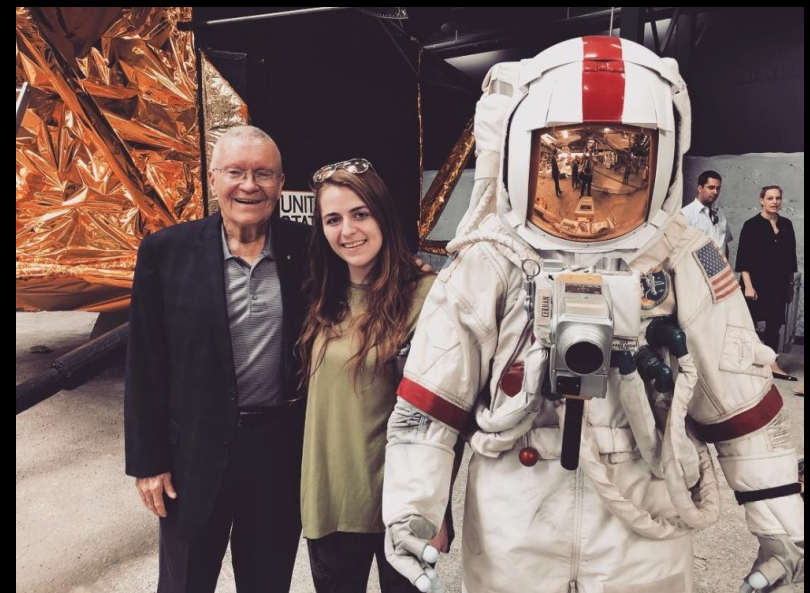

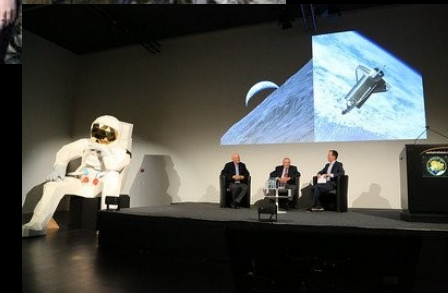

The lecture will take place in the space hall or forum of the museum and will be in English language. The seating capacity is limited due to available seats. This is one of the last chances to see an Apollo legend that close in Europe!

WOW!

Fred -

You have really been busy this quarter!

Message from XO - Rear Admiral Ryan Case

19-998210

Greetings Crew!

The 4th Quarter is always the best part of every year. All my Regional work is accomplished, the best meetings are upon us, and The Case's get to host one of them! It's always a pleasure to have everyone come over and enjoy some pizza and a show while simultaneously donating to a charity for Christmas. It's a strange feeling to know that this will be my last time writing for the Newsletter as the XO of the ship. I've enjoyed serving as John's XO for these last 4 years and am looking forward to continuing his positive work into the future.

20-634851

My October was CRAZY full - from a bachelor party that I had to host, to a company trip to Denver, Colorado, an then hated having to miss the Masquerade Party but did so for a good reason (I think) - we had a friend of ours get married in Florida and had to drive down to attend that... and then follow that weekend up with ANOTHER wedding the next week. It was a wild ride.

20-753912

21-854122

22-002145

Page 22

Above Left: Friend's wedding in Florida

Above: Ryan at a friend's wedding on the Mississippi Gulf Coast

Message from XO - Rear Admiral Ryan Case

19-998210

November, thankfully, gave me a little breathing room as I simply got to enjoy the holiday, host the meeting at our home, and prep for the incoming Christmas storm.

20-634851

In December, as most of you know, Ann and I spent two weeks at Walt Disney World - but the part that many don't know is that a plague essentially went through our home in the 3 days leading up to our trip and practically forced us to pack the hour before we left for a 10 hour drive. That being said, we managed to pull it off and sincerely enjoy ourselves at Disney with Kahlan. While there, we got Kahlan her first haircut and (I must say) it looks very cute.

20-753912

21-854122

As far as the Region is concerned, there's not a TON going on right now aside from accepting Award Nomination that are due in by the end of January and beginning the process of accepting 2020 Summit Bids - but each of these deadlines are months away at the time of submittal.

22-002145

Above: Visiting the Blue Moon Brewery during my trip to Denver, Colorado

With that, I look forward to seeing everyone in the New Year.

On and Ever Upward!

New Years Fireworks at WDW

Message from Chief of Operations - Lt. Commander Clay Bartunek

19-998210

This quarter began with our 3rd philanthropy project of the year, the Jackson Diabetes Walk on October 7th. Only Bethany and I were able to attend, but we had a great time making balloon animals for the kids and provided the canine watering station for our 4 legged friends. As you can see, one pup decided to go all in.

Our annual Masquerade Party followed on the 20th at Scott's Broadmeadow Methodist Church. Ethan's fairy godmother showed up, but she's not very pretty. We all enjoyed good food including fried Tribbles (a Klingon favorite), fellowship, games & video.

Saturday, Nov. 17th brought our Anti-Turkey Pizza Party to the Case's with our final philanthropy project of the year, *Toys for Tots* donations. Thanks to all who provided gifts for children this Christmas.

Friday, Dec. 7th was Movie Night at the Yelverton's with breakfast food, my favorite! John, you really do make great omelets.

Saturday, Dec. 15th brought our annual Christmas party to my house once again. As always, great food and playing "Dirty" Santa was a blast with this group. Thanks to Tucker, my church friend, for providing the cookie dough. It was a big hit.

Five of us closed out the year on Saturday, Dec. 29th to go see the *Aquaman* movie. We tried the Cinemark theater, but their reserved seating policy made it impossible. So, we ended up at Parkway Place theater in Flowood. We did see an SUV in the parking lot with a front license plate saying "NCC 1701 Enterprise". We must assimilate them!

Looking forward to another great year serving with this crew!

Happy New Year!

New Horizons flew past distant 2014 MU69, nicknamed "Ultima Thule."

Humankind has now taken pictures of a "snowman" 4 BILLION miles from our home. Props to NASA engineers and support staff who are continuing to work in spite of the government shutdown because otherwise they would have missed the rendezvous Dec. 31, 2018 and Jan. 1, 2019 (New Years Eve and Day) as New Horizons flew past distant 2014 MU69. The object was nicknamed "Ultima Thule." after review of more than 34,000 suggestions from the public, it means "beyond the borders of the known world." (Thule is pronounced "TOO-lee.")

The New Horizons spacecraft will continue downloading images and other data in the days and months ahead, completing the return of all science data over the next 20 months. New Horizons launched in January 2006, and is expected to return Kuiper belt data until 2021.

When Launched, the instruments available to New Horizons Mission Control were:

Visible and infrared imager/spectrometer (RALPH)

Ultraviolet imaging spectrometer (ALICE)

Radio science experiment for studying atmospheres (REX)

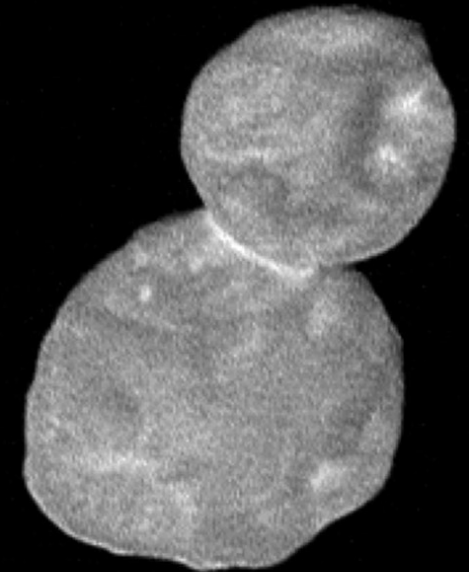

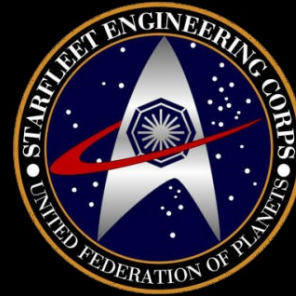

Telescopic camera (LORRI)

Solar wind and plasma spectrometer (SWAP)

Energetic particle spectrometer (PEPSSI)

Space dust counter (SDC)

For more than you ever wanted to know about the instrument package, see <http://spaceflight101.com/newhorizons/instrument-overview/>

Message from Chief Science Officer - Fleet Captain Scott M. Crawford

TRIP TO SAN FRANCISCO

In mid-October, I travelled to San Francisco, CA, for a meeting with transportation network company UBER executives and legal counsel to try to convince them to provide service to people who need wheelchair vans. Currently, UBER is resisting the clear mandate of the Americans with Disability Act to provide "equivalent service" to people of all abilities, including those that need ramp or lift-equipped vehicles. UBER is fighting this in court, claiming they don't purchase vehicles (not true) and that they are only a "software company." It will be years before we know the outcome in the case.

The more pleasant side of the trip was riding the near-perfect transit system they have in San Francisco, from trolleys dating back to the early 20th Century to the modern Bay Area Rapid Transit (BART). The trolleys are mostly from the 1920's through 1940's and are all made accessible by loading platforms and hand-deployable ramps.

Above: I rode by their national headquarters on Market Street before our meeting the following day.

"KEEP BUILDING JACKSON" LEGO Display

"Keep Building Jackson" was another big success this year. I spent the entire month of November setting it up, and it showed from December 1st through January 12th. New this year was a working LEGO Roller Coaster, a large "Vestas" wind turbine on a rocky bluff, and a downtown diner. I'm already working on a new original model of "Sal & Mookie's". Owner, Jeff Good, asked me to build a water tower because of recent water main breaks. I told him I'd do even better, by adding a "Water Reclamation and Purification System" (from my imagination, designed by "NASA" – not really).

19-998210

Another year gone and full of fond memories. Kahlan and I had to miss a lot of meetings in this last stretch of the year. From weddings to family get togethers it was hard to attend everything! I am super glad that we got to go to movie night and the Christmas party. As we go into this new year, I hope to attend more meetings and see everyone more.

December was a fun month for the Case's. We got to take Kahlan to Disney World! Her favorite ride was definitely the carousel, she rode it 3 times! She also did a great job meeting with the characters. We spent the time with lots of family and friends. We rotated in and out about 5 friends and family in the two weeks we were there. We saw all the Christmas shows, all the firework shows, watched the Candlelight Processional with Jodi Benson presenting, tried new restaurants and experienced new things through the eyes of Kahlan. It was an absolutely magical time!

Happy New Year everyone!

I hope everyone had a great and safe holiday season with your family and friends. 2018 was an amazing year for the USS Haise and 2019 is shaping up to be even better! There are so many exciting things happening with Star Trek in 2019 I can't wait to participate in them with treasured friends that I have had the distinct honor and pleasure of getting to know through the years. Having said that, this will be my last Newsletter Article as Chief of Security. I am humbled to be taking the XO Position in 2019 - thank each and everyone of you for your vote of confidence in me! I look forward to jumping into my new duties working with Ryan as Captain. John did an amazing job as Captain over the last several years and Ryan and I definitely have big shoes to fill working with each of you.

Over the last couple of months a number of us (me included) have come down with a cold, flu, respiratory infection, etc. Following are some simple yet effective tips to prevent this from occurring in 2019:

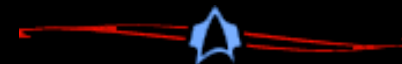

How Germs Spread

The main way that illnesses like colds and flu are spread is from person to person in the respiratory droplets of coughs and sneezes. Sometimes germs also can be spread when a person touches respiratory droplets from another person on a surface like a desk or other inanimate object.

How to Stop the Spread of Germs

- Cover your mouth and nose when coughing or sneezing
- Cough or sneeze into a tissue and then throw it away. Cover your cough or sneeze if you do not have a tissue. Then, clean your hands, and do so every time you cough or sneeze.

- *Avoid touching your eye, mouth, and nose*

Germs are often spread when a person touches something that is contaminated and then touches his or her eyes, nose, or mouth.

- *The "Happy Birthday" song helps keep your hands clean?*

Not exactly. Yet we recommend that when you wash your hands – with soap and warm water – that you wash for 15 to 20 seconds. That's about the same time it takes to sing the "Happy Birthday" song twice!

- *Alcohol-Based Hand Wipes and Gel Sanitizers Work Too*

When soap and water are not available, alcohol-based disposable hand wipes or gel sanitizers may be used. If using gel, rub your hands until the gel is dry. The gel doesn't need water to work; the alcohol in it kills the germs on your hands.

- *Avoid close contact with people who are sick*

The most common way of getting the flu is through contact with others who have the flu

- *Stay home when you are sick*

No one wants your germs, so *please* keep them to yourself!

- *Get enough sleep, exercise regularly, and eat a healthy diet to keep your defenses up*

We encourage you to participate in your site's Health by Numbers Challenge!

- *If you have a chronic health condition, do everything you can to keep it under control.*

Be sure to take your medication as prescribed.
